LinTronic product

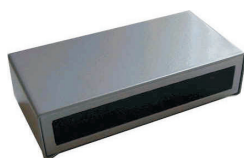

PROTOCOL.PDF - APPENDIX.PDF

It is strongly recommended to read these two files first.

COMMAND_039.PDF

This command is used to instruct the TT455-RT-238 to send an IR code.

Example <01000397010010030000000000000003236>

IR

COMMAND_915.PDF

This command is used to instruct the computer of how you operate the Bang&Olufsen remote control. It provides unique commands by keeping track of Mode and Trigger.

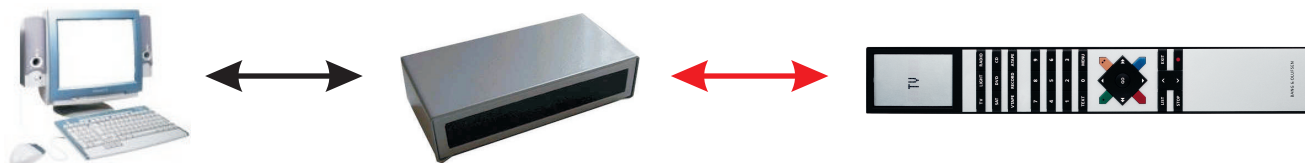

Example: <0001915001010128000001062>

CODESET 701.PDF

This PDF explains how to send and receive B&O codes.
Send as infrared commands or as digital commands on the digital output 2.

If you want to receive codes for control of computer programs etc. then Command 915 is recommended.

COMMAND_232.PDF

This command allows the programmer of an automation system, to allocate fixed commands in his program, for a specific Action in the TT455-RT-238, but simply change the configuration of the TT455-RT-238 in order to control the wanted type of DVD player. If the customer later changes the DVD player, then only the TT455-RT-238 needs a reconfiguration, not the computer program.

Example: `<0100232132010--->`
